

PYROSPOT DS 55N/DS 55NV

Pyrometer for industrial application

Overview

Digital pyrometers with RS-485 interface

Special features

- For temperature measurements between 550 °C and 3000 °C
- Temperature linear output 0/4 to 20 mA, switchable
- Display, keys and RS-485 interface
- Different fixed optics or vario optics with motor focus
- Laser aiming light, integrated color video camera or through-lens sighting
- Very short response time 2 ms

Description and application

The digital DIAS PYROSPOT DS 55N pyrometers are specially designed for industrial use. They are suitable for temperature measurements from 550 °C on a variety of surfaces, such as metals, graphite or ceramics.

With different fixed optics, target sizes starting from 0.8 mm are available. As an option a vario optics with motorized focus is possible. For example, if the devices are installed in hard-to-reach places, the user can conveniently change or adjust the focus. Emissivity and motor focus can be set directly at the device using buttons and display. All other parameters are adjusted via interface and software, for example PYROSOFT Spot.

Even in harsh environments, the compact and robust IP 65 stainless steel housing of the pyrometer can withstand. With a minimum response time of only 2 ms (t_{95}), the devices also realize fast measuring tasks.

Thanks to the temperature linear standard output signal of 0/4 to 20 mA, the pyrometers can be easily integrated into existing measurement and control systems. The pyrometer has a galvanically isolated RS-485 interface. The device is thus bus capable and uses the Modbus RTU protocol. The connection to local networks can be supported by an Ethernet interface box.

The integrated red laser aiming light helps to precisely align the pyrometer with the target. If the objects are very hot, it is recommended to use an integrated color video camera instead of the laser as a aiming variant (PYROSPOT DS 55NV). Thus, a glare-free alignment is easily possible. The integrated video camera also facilitates installation in difficult local conditions, where the pyrometer is difficult to reach or the measurement object is not visible. Optionally, a through-lens sighting is available.

Typical application areas:

- Steel and metal industry
- Furnace industry
- Soldering applications
- Ceramic industry

PYROSPOT DS 55N/DS 55NV

Pyrometer for industrial application

Sub temperature range of analog output	adjustable within measuring temperature range, minimum span 50 °C									
Spectral range	0.8 µm to 1.1 µm									
Emissivity ε	0.050 to 1.000									
Response time (t ₉₅)	2 ms ³ , adjustable up to 100 s									
Measurement uncertainty ¹	0.5 % of measured value in °C + 1 K									
Reproducibility ¹	0.1 % of measured value in °C + 0.5 K									
NETD ²	0.1 K ¹									
Transmittance	50 % to 100 %									
Ambient radiation	adjustable within measuring temperature range									
Analog output	0/4 mA to 20 mA, temperature linear, maximum burden 500 Ω (galvanically isolated)									
Interface	RS-485 (galvanically isolated), half duplex, max. 115 kBd, Modbus RTU protocol									
Aiming	DS 55N: laser aiming light (630 ... 680 nm, class II, < 1 mW) or through-lens sighting ⁴ DS 55NV: video camera, composite video, galvanically isolated (PAL (B), 50 Hz or optional NTSC (M), 60 Hz)									
Switching output/ Switching threshold	1 opto relay, R _{Burden} min. 48 Ω (galvanically isolated)/adjustable within measuring temperature range									
Operating and display elements	Two push-buttons for „Parameter menu“, „Enter“, „Up“ and „Down“, OLED with standard display of temperature and emissivity, pilot light button (option)									
Parameters	– adjustable via interface and software: emissivity, transmittane, ambient radiation, response time, memory settings, sub temperature range of measuring output, switching threshold of switching output, motor focus – adjustable additionally on the device with push-buttons and display: emissivity, motor focus									
Power supply	24 V DC ± 25 %, residual ripple 500 mV									
Power consumption	max. 1.5 W (without burden on switching output)									
Operating temperature	0 °C to 70 °C									
Storage temperature	–20 °C to 70 °C									
Weight	approx. 600 g									
Housing	stainless steel housing with plug connector, length approx. 105 mm (without through-lens sighting), diameter 50 mm									
IP code	IP65 nach DIN EN 60529 und DIN 40050									
Test regulations	EN 55 011:1998, limit class A									
CE symbol	according to EU regulations									
Scope of delivery	PYROSPOT DS 55N/DS 55NV, user manual, inspection sheet, software PYROSOFT Spot, without connection cable (please order seperately)									

¹ Specifications for black body radiator, $T_{\text{ambience}} = 23 \text{ °C}$, $t_{95} = 1 \text{ s}$. ² Noise equivalent temperature difference. ³ With dynamic adaption at low signal level. ⁴ Operating temperature up to 50 °C due to the risk of burns.

Technical data DS 55NV with video camera

Video signal	Composite video signal approx. 1Vss at 75 Ω (galvanically isolated, video signal can be deactivated via software)
Color norm	PAL (B), 50 Hz (optional color norm NTSC (M), 60 Hz)
Resolution	1/3 inch video chip 628 × 586 pixels (NTSC option: 510 × 496 pixels)
Exposure control	automatic
Visible field	approx. 8 % × 6 % of adjusted measurement distance (NTSC option: 6.5 % × 5 %)
Date/time	Real-time clock with minimum 3 days power reserve, adjustable via software
Durable image displays	Target mark in measurement spot size, measurement temperature, emissivity
Optional image displays	Via software: serial number, device name or user-defined text (16 characters), date, time, temperature unit °C/°F, 12/24 hours display

The video image can be displayed via the additionally available TFT monitor.
