OceanView Spectroscopy Software

Experiments/Processing Modes

- Quick View
- Quick View Minus Background
- Absorbance
- Reflection
- Transmission
- Raman
- Quick View Fluorescence
- Relative Irradiance
- Absolute Irradiance
- Color
- Photometry
- Concentration
- Strip Charts
- Spectral Math/Arithmetic
- Spectral Splicing
- Schematic View

OceanView Puts You in the Driver's Seat

OceanView spectroscopy software combines powerful data processing capabilities with a user friendly graphical interface for use with Ocean Optics miniature spectrometers. OceanView is highly customizable and includes a schematic view that provides a visual roadmap of data flow from spectral inputs to processed results. OceanView delivers answers rather than just a simple spectrum.

Features

Inspired by customer feedback across a variety of applications, OceanView delivers a high level of customizability and experimental control.

Easy to Use

- Simplified user interface
- Extensive in-software help
- Persistence of user settings
- Saving and reloading experiments

Customizable

- Schematic view of data flow
- Custom data processing

Complete Experiment Control

- On-the-fly processing
- Spectral Splicing
- Interpolation
- Improved handling of non-spectral data

Answer-Based Output

- Customized result display
- Device output control
